

On the two professional sports facilities, we have a couple of options.

1. Add a question to approving increasing the HOT tax to support one or both of these venues
2. Not address in QoL bond but finance a separate way that does not require voter approval, via a public/private partnership model that is available with new state legislation.

If we do #1, it takes two elections ... one for the venue and tax increase and a second to authorize the debt. Given that the opportunity for the AAA baseball team is fairly immediate my inclination is to go with #1 and just adopt a formal resolution of intent to build either facility if there is a firm commitment for a team.
